Edgewalks Sdn Bhd has over 18 years of experience in Management Systems Auditing, namely Quality Management System (ISO 9001:2015); Environment Management System (ISO 14001:2015); Occupational Health and Safety Management System (ISO 45001:2018) and Information Security Management System (ISO 27001:2013).

Mr. Peter Louis is the Principal of Edgewalks Sdn Bhd. He is a Certified Lead Auditor for the above-mentioned Management Systems.

Professionalism deems it necessary to declare that Edgewalks Sdn Bhd will not render auditing services if it accepts consultancy services / or is a consultant for the same company.

Therefore, Edgewalks Sdn Bhd has to decide if it wants to be a consultant or an entity that offers certification services.

Should a company entity decide to be certified to an ISO Management system, it has to apply for certification, gets certified, and maintain certification.

There are basically three things that a company should execute:

1. Do a document review of the Management system (saves money to see all documents are in order)
2. Do a certification Audit, and attain certification
3. Do a yearly Surveillance audit (a recertification audit is done every third year in place of the surveillance audit)

Peter Louis, manages Document Review, Gap audits (usually done in place of document review), Certification audits, Surveillance Audit, Recertification (Or Triennial) audits. He is registered with Certification Bodies to provide seamless, paperless and transparent auditing services.

Some companies / entities might hire an independent auditor to conduct an internal audit (in-house audit) or a second party (i.e. supplier or subsidiaries audit). This can be done by for the

company/ entity provided the auditor is not involved or connected with the Certifying Body. Contact Edgewalks Sdn Bhd to conduct (or be a mentor) to your company's internal auditors.
